

ACC ALN Cross Institutional Projects

(Bret Smith on behalf of the ALN Planning Group. 2/10/20):

The purpose of the cross institutional projects is:

1. Develop strong working relationships with peers at other ACC institutions
2. Harness the wisdom throughout the ACC to solve problems and pursue opportunities
3. Where applicable, seek broader cross-institutional support (ACC) in developing and testing solutions

Goal: By the time we gather at NC State on May 12-14, it is our hope that each project will be at one of three destinations: 1) implemented in pilot project form; 2) ready to pilot; or 3) ready to propose.

As part of the program at NC State, each team will do a 3-minute lightning round presentation on their project followed by a 3-minute Q and A. These presentations will serve as a basis for a written summary of each of the projects to be submitted in digital form by the end of May.
